1 more

Count how many things each animal has found then give them each 1 more. Write the numbers in the boxes.

How many acorns does Squilly have?

How many acorns are there now?

How many berries has Stripe found?

How many berries are there now?

Odd and even

Count the other things Squilly and Stripe have found and give them each 1 more. Circle ‘odd’ or ‘even’ under each number.

How many leaves?

How many now?

How many worms?

How many now?

I love acorns.

Mmm, berries.

Squilly now has an odd number of acorns...

...and Stripe now has an even number of berries.

The number line at the bottom of the page can help you choose ‘odd’ or ‘even’.
