Subtracting fractions

The mice are using pieces of cheese to practise fractions. Can you help them? There’s room on this plate for 10 pieces. Draw 7 pieces of holey cheese on the plate.

Now wipe away 2 pieces.

 Fill in the empty box to show the fraction of the plate that is still covered by cheese.

\[
\frac{7}{10} - \frac{2}{10} = \frac{5}{10}
\]

Trace these fractions and fill in the empty boxes. You could draw and wipe away pieces of cheese on the plates to help you.

\[
\frac{2}{4} - \frac{1}{4} = \frac{1}{4}
\]

\[
\frac{5}{6} - \frac{4}{6} = \frac{1}{6}
\]
