Groups of 10

It’s the family boat race today. There are 2 boats at the front, each with 10 animals in. Write how many animals there are altogether.

1 more boat of 10 animals is catching up. Write how many animals there are now.

1 more boat of 10 animals is behind. Fill in the boxes to show how many boats there are now, and how many animals altogether.

If 10 more animals joined, in 1 more boat, how many boats would there be, and how many animals altogether? Fill in the boxes.

If another 10 animals joined, in 1 more boat, how many boats would there be, and how many animals altogether? Fill in the boxes.
